RE: Resource Recovery Certification RR0268-A, Closure Notification
Classification - U

Dear Mr. Haake:

The Missouri Department of Natural Resources' (MDNR) Hazardous Waste Program's (HWP) Permits Section has received your letter of March 31, 1998, regarding the disposition of the resource recovery equipment. Thank you for your prompt response.

Please provide more detail concerning the non-metal pieces of the unit sent to the Bridgeton Landfill. Specifically, we need to know if these pieces were in direct contact with hazardous wastes during operation of the unit. If the non-metal pieces were in contact with hazardous wastes, we need to know whether any testing was performed to determine if hazardous waste residues remained on the pieces before they were sent to the landfill. Further information regarding the scrap metal sent for recycling will not be required.
